

## Bushcomm **EasySee** Mining and Recreational Safety Whips.

The Bushcomm **EasySee** Safety Whip adds a new dimension to vehicle visibility in mining and visibility critical activities. High intensity LEDs on the mast provide added visibility during daylight hours. These are potential life savers in extremely dusty environments, where standard top mounted lamps become unseeable.

Turned off

Turned on

Turned on, with bright light directed at whip.

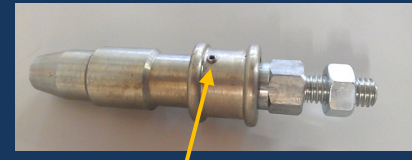

### Standard model :

1.3metres tall
